In publication,

Our city, Komatsushima has been developed as a port city since ancient times against the backdrop of the rich natural environment and one of the best natural ports in Shikoku "Komatsushima Port" since the city system came into effect on June first, 1951 (Showa 26).

I would like to express my sincere gratitude to all our predecessors for their efforts and the tireless work of the citizens to celebrate the 70th anniversary of Komatsushima City this year.

However, recent years, with the rapid progress of declining birthrates and the aging population, internationalization, advanced information technologies, etc., the environment surrounding local governments has reached a major turning point, and the needs of citizens are also diversifying. Based on these changes we formulated "A 6th Comprehensive Plan for Komatsushima City" and started it in the fiscal year of 2017 (Heisei 29). Our goal is to make Komatsushima, a city of hope and trust that shines into the future. We are making every effort for the active participation of citizens in the city and administration to have a partnership throughout the city.

I would like everyone who reads this handbook to know the history, culture and charm of our city, Komatsushima. I ask for your further understanding and cooperation for the development of the city administration.
